COMPARATIVE ANALYSIS

VNIE, CEG

March 3, 2026

Executive Summary

VNIE exhibits significantly higher revenue ($40.0 billion vs. $22.7 billion) and net income ($20.1 billion vs. $2.3 billion) compared to CEG. It also demonstrates superior profitability metrics, with a return on equity of 75.9% versus 16.0%, and an operating margin of 60.0% compared to 13.6%. Conversely, CEG maintains a higher current ratio (1.53x vs. 1.08x), indicating a stronger short-term liquidity position.

Key Metrics Comparison

METRIC	VNIE	CEG
Revenue	$40.0 billion	$22.7 billion
Net Income	$20.1 billion	$2.3 billion
Total Assets	$99.6 billion	$57.2 billion
Stockholders' Equity	$26.4 billion	$14.5 billion
Operating Cash Flow	$23.1 billion	$4.2 billion
Operating Income	$24.0 billion	$3.1 billion
Debt-to-Equity Ratio	2.33x	2.92x
Return on Equity	75.9%	16.0%
Return on Assets	20.1%	4.0%
Current Ratio	1.08x	1.53x
Operating Margin	60.0%	13.6%
Net Margin	50.1%	10.2%
Capital Expenditures	$1.5 billion	$2.9 billion

METRIC	VNIE	CEG
Price-to-Earnings (P/E)	N/A (not provided)	7.40x

Relative Strengths

VNIE:

- Demonstrates high profitability with an operating margin of 60.0% and net margin of 50.1%, indicating efficient operations.
- Maintains a substantial net income of $20.1 billion, supported by $23.1 billion in operating cash flow.
- Possesses a strong asset base with total assets of $99.6 billion and a high return on equity of 75.9%.

CEG:

- Exhibits superior short-term liquidity with a current ratio of 1.53x.
- Maintains a lower debt-to-equity ratio of 2.92x, suggesting comparatively lower leverage.
- Trades at a P/E ratio of 7.40x, indicating potentially undervalued earnings relative to market expectations.

Risk Comparison

CEG's higher debt-to-equity ratio of 2.92x compared to VNIE's 2.33x indicates greater leverage, which could translate into increased financial risk if earnings decline. Additionally, CEG's lower return on assets (4.0%) and net income ($2.3 billion) relative to total assets and revenue suggest less efficient utilization of assets and earnings generation capacity. Its higher capital expenditures ($2.9 billion vs. $1.5 billion) also imply greater investment commitments, potentially impacting liquidity and cash flow stability.

Analyst Notes

VNIE demonstrates a markedly stronger profitability profile, with operating and net margins exceeding those of CEG by approximately 46 and 40 percentage points, respectively. Its higher return on equity (75.9%) reflects more effective capital deployment. The company's substantial revenue and net income figures, coupled with a robust operating cash flow, suggest a highly efficient operational framework.

In contrast, CEG's higher current ratio indicates better short-term liquidity, but its elevated leverage and lower profitability metrics imply higher financial risk and less efficient asset utilization. The lower P/E ratio may reflect

market perceptions of growth prospects or earnings stability. Overall, VNIE's financial structure and profitability metrics position it as a more efficient and potentially less risky entity, whereas CEG's higher leverage warrants closer scrutiny regarding its long-term financial resilience.

Trend Analysis

trend_analysis

Trend Analysis

Debt-to-Equity Ratio:
VNIE has a Debt-to-Equity ratio of 2.3345, indicating a higher leverage compared to CEG's ratio of 2.9204. This suggests VNIE relies slightly less on debt financing relative to equity.

Return on Equity (ROE):
VNIE's ROE is 75.87%, significantly higher than CEG's 15.97%, reflecting more efficient use of shareholders' equity to generate profits.

Return on Assets (ROA):
VNIE's ROA stands at 20.13%, outperforming CEG's 4.05%, indicating better asset utilization.

Current Ratio:
VNIE's current ratio is 1.0776, slightly lower than CEG's 1.5256, suggesting VNIE has a marginally tighter liquidity position.

Operating Margin:
VNIE's operating margin is 59.99%, substantially higher than CEG's 13.62%, demonstrating VNIE's greater efficiency in managing operating expenses relative to revenue.

Net Margin:
VNIE's net margin is 50.14%, compared to CEG's 10.23%, indicating VNIE retains a larger portion of revenue as profit.

Free Cash Flow:
VNIE's free cash flow is approximately $21.58 billion, whereas CEG's is about $1.29 billion, highlighting VNIE's stronger cash generation capability.

Revenue:
VNIE's revenue is $40 billion, significantly higher than CEG's $22.66 billion.

Net Income:
VNIE reports a net income of approximately $20.06 billion, while CEG's net income is about $2.32 billion.

Operating Income:
VNIE's operating income is roughly $23.99 billion, compared to CEG's $3.09 billion.

Total Assets:
VNIE holds assets valued at approximately $99.63 billion, whereas CEG's total assets are around $57.25 billion.

Total Liabilities:
VNIE's liabilities amount to about $61.72 billion, with CEG's liabilities at approximately $42.40 billion.

Stockholders' Equity:
VNIE's equity stands at roughly $26.44 billion, while CEG's is about $14.52 billion.

Operating Cash Flow:
VNIE's operating cash flow is approximately $23.06 billion, compared to CEG's $4.24 billion.

Capital Expenditures:
VNIE's capital expenditures are about $1.48 billion, whereas CEG's are approximately $2.95 billion.

Risk Factors

risk_factors

Financial Leverage

Both VNIE and CEG exhibit high debt-to-equity ratios, with VNIE at 2.3345x and CEG at 2.9204x, indicating significant leverage that could pose financial risk in adverse market conditions.

Profitability Margins

VNIE demonstrates a strong operating margin of 59.99% and net margin of 50.14%, suggesting efficient operations. In contrast, CEG's operating margin is 13.62% and net margin is 10.23%, reflecting comparatively

lower profitability.

Liquidity Position

VNIE's current ratio is 1.0776, indicating just adequate short-term liquidity, while CEG's current ratio is higher at 1.5256, suggesting a more comfortable liquidity position.

Cash Flow and Capital Expenditures

VNIE's operating cash flow stands at USD 23.059 billion, with capital expenditures of USD 1.482 billion, indicating strong cash generation relative to investment needs. CEG's operating cash flow is USD 4.237 billion, with capital expenditures of USD 2.949 billion, which may impact free cash flow and financial flexibility.

Market Valuation

CEG's price-to-earnings ratio is 7.4x, indicating the market's valuation relative to earnings, whereas VNIE's valuation metric is not provided but can be assessed in conjunction with other financial data.

Asset and Liability Levels

VNIE's total assets amount to USD 99.627 billion with total liabilities of USD 61.718 billion, resulting in stockholders' equity of USD 26.437 billion. CEG's total assets are USD 57.249 billion, with liabilities totaling USD 42.396 billion and stockholders' equity of USD 14.517 billion.

Overall Risk Considerations

The high debt levels combined with varying profitability margins and liquidity positions suggest that both companies face financial risks, particularly related to leverage and cash flow management.
